Positions

Hoda
Computer The company produces software organizations.
My work was programming with .NET.
Then I migrated to Java and Android programming.

Personal /
Freelnear I developed dozens of apps and games for some time, and these apps and games
were made to order companies and teams and myself.

Moodic The company works in the field of VOD and AOD.
In this company, I worked on the production of a special app to stream video (like
Netflix).

Ministry of
Science and
Academic
Research The organization's goal is to provide organizational software and services for
employees and for students and professors of universities.
My work in this organization is the design of the system and the developer of the
Android.

Sample of
my projects

https://aaaamirabbas.github.io/projects
